SELF-REPORTING BED AVAILABILITY, UPDATING HOSPITAL PROFILE INFORMATION & DISASTER MANAGEMENT ASSISTANCE TRAINING MODULE

The following procedure is required for individual hospital units to self-report bed availability status, update their hospital profile/contact information, and obtain assistance during bed availability crises.

HARDWARE NEEDED

Computer with internet access.

WEBSITE INSTRUCTIONS ON THE USE OF THE UPDATE PROGRAM

Instructions on the use of web-based bed availability/crisis management programs are available on the Help Page of the website. They can be viewed by going to the Home Page (www.perinatal.org) and clicking on Help in the column of pages noted on the upper left hand side of the page.

INDIVIDUAL HOSPITAL PASSWORD FOR UPDATING BED AVAILABILITY

To obtain the password for your hospital, contact the Southern or Northern Divisions of the California Perinatal Transport System by phone or email and request one.

Please note: A hospital's password is the responsibility of the individual hospital. If for any reason you are concerned about its security, contact the NCPeTS or SCPeTS office to request a new one.

SCPeTS Program Director: Lisa Bollman

NCPeTS Program Director: Alvin Hackel
 Email address: hackel@stanford.edu
 Phone Number: 650-723-6307

UPDATING BED AVAILABILITY

1. Turn on the computer and using your web browser, go to the Home Page of the California Perinatal Transport System, <http://www.perinatal.org>

California Perinatal Transport System

The California Perinatal Transport System was established in 1976 pursuant to the enactment of California Assembly Bill 4439. This act appropriated funds for the development of a dispatch service to address the need for facilitating transports of critically ill infants and mothers with high risk conditions to regional Neonatal Intensive Care Units (NICUs) and Perinatal High Risk Units (PHRUs).

The CPeTS provides the collection and analysis of perinatal and neonatal transport data for regional planning, outreach program development, and outcome analysis. This information is reported back to the participating hospitals, and the Division of Maternal and Child Health of the California Department of Health. We support an integrated network of regional perinatal programs in California. Opportunities for regional perinatal programs to share and solve their common problems are provided through meetings of its Advisory Committee.

The California Perinatal Transport System can assist health care professionals in the REFERRAL of high-risk pregnant women and newborn infants. An updated bed availability status is obtained daily from regional CCS approved neonatal intensive care units. There are many NICUs participating in this daily survey that includes an array of County, for-profit, non-profit, University affiliated, and HMO owned facilities. This information is being made available via this website.

3. Move the cursor to the Bed Availability line and click on it. The Division Bed Availability Page will appear.

Southern California Perinatal Transport System
Phone: (562) 945-6484 & Fax (562) 945-6489

The Southern California Perinatal Transport System (SCPTS), formerly known as the Infant Medical Dispatch Center, was established in 1976 pursuant to the enactment of California Assembly Bill 4439. This act appropriated funds for the development of a dispatch service to address the need for facilitating transports of critically ill infants and mothers with high risk conditions to regional Neonatal Intensive Care Units (NICUs) and Perinatal High Risk Units (PHRUs).

Specific Legislative Mandate

- Establish a 24-hour-a-day, year-round dispatch center linking all hospitals providing obstetrical services with neonatal intensive care nurseries.
- Provide service for the region south of the Tehachapi Mountains (Southern California) encompassing the following 11 counties: Imperial, Inyo, Kern, Los Angeles, Orange, Riverside, San Bernardino, San Diego, San Luis Obispo, Santa Barbara, and Ventura.
- Assist, if needed, in referral of critically ill newborn infants to appropriate California Children Services (CCS) certified neonatal intensive care centers.
- Generate a centralized data base, consisting of statistical information for monitoring and evaluating the functions, efficiency, and timeliness of all infant transports within the southern California region.

- To view hospital profile/contact information, click on the name of the hospital and new page will appear with hospital contact information.
