SELF-REPORTING BED AVAILABILITY, UPDATING HOSPITAL PROFILE INFORMATION & DISASTER MANAGEMENT ASSISTANCE TRAINING MODULE

The following procedure is required for individual hospital units to self-report bed availability status, update their hospital profile/contact information, and obtain assistance during bed availability crises.

HARDWARE NEEDED

Computer with internet access.

WEBSITE INSTRUCTIONS ON THE USE OF THE UPDATE PROGRAM

Instructions on the use of web-based bed availability/crisis management programs are available on the Help Page of the website. They can be viewed by going to the Home Page (www.perinatal.org) and clicking on Help in the column of pages noted on the upper left hand side of the page.

INDIVIDUAL HOSPITAL PASSWORD FOR UPDATING BED AVAILABILITY

To obtain the password for your hospital, contact the Southern or Northern Divisions of the California Perinatal Transport System by phone or email and request one.

Please note: A hospital's password is the responsibility of the individual hospital. If for any reason you are concerned about its security, contact the NCPeTS or SCPeTS office to request a new one.

SCPeTS	Program Director: Lisa Bollman Email address: Lisa@perinatalnetwork.org
	Program Manager: Kevin Van Otterloo Email address: Kevin@perinatalnetwork.org Phone Number: 714-921-9755
NCPeTS	Program Director: Alvin Hackel Email address: hackel@stanford.edu Phone Number: 650-723-6307

UPDATING BED AVAILABILITY

1. Turn on the computer and using your web browser, go to the Home Page of the California Perinatal Transport System, <http://www.perinatal.org>

California Perinatal Transport System

California Perinatal Transport System

The California Perinatal Transport System was established in 1976 pursuant to the enactment of California Assembly Bill 4439. This act appropriated funds for the development of a dispatch service to address the need for facilitating transports of critically ill infants and mothers with high risk conditions to regional Neonatal Intensive Care Units (NICUs) and Perinatal High Risk Units (PHRUs).

The CPeTS provides the collection and analysis of perinatal and neonatal transport data for regional planning, outreach program development, and outcome analysis. This information is reported back to the participating hospitals, and the Division of Maternal and Child Health of the California Department of Health. We support an integrated network of regional perinatal programs in California. Opportunities for regional perinatal programs to share and solve their common problems are provided through meetings of its Advisory Committee.

The California Perinatal Transport System can assist health care professionals in the REFERRAL of high-risk pregnant women and newborn infants. An updated bed availability status is obtained daily from regional CCS approved neonatal intensive care units. There are many NICUs participating in this daily survey that includes an array of County, for-profit, non-profit, University affiliated, and HMO owned facilities. This information is being made available via this website.

2. On the left hand side of the page, there are two boxes: Hospital and Password. Place the cursor in the Hospital box, scroll down to your hospital, and click on it.

The screenshot shows the California Perinatal Transport System website. On the left, a dropdown menu lists various hospitals, with a red arrow pointing to the 'Glendale Adventist Medical Center' option. Below the dropdown is a 'Password:' label, a text input field, and a 'Login' button, with another red arrow pointing to the input field. The main content area on the right features the 'California Perinatal Transport System' logo, a row of five small photos of healthcare professionals, and a paragraph of text describing the system's history and purpose. The text includes: 'California Perinatal Transport Systems was established in 1976 pursuant to California Assembly Bill 4439. This act appropriated funds for the establishment of a dispatch service to address the need for transportation of critically ill infants and mothers with high risk pregnancies to Neonatal Intensive Care Units (NICUs) and Perinatal Transport Centers. The system's collection and analysis of perinatal and neonatal data for planning, outreach program development, and information is reported back to the participating hospitals. The Department of Maternal and Child Health of the California Department of Health support an integrated network of regional perinatal transport centers. Opportunities for regional perinatal programs to share information and resources are provided through meetings of its Advisory Committee. The California Perinatal Transport System can assist health care professionals in the REFERRAL of high-risk pregnant women and newborn infants. An updated bed availability status is obtained daily from regional CCS approved neonatal intensive care units. There are many NICUs participating in this daily survey that includes an array of County, for-profit, non-profit, University affiliated, and HMO owned facilities. This information is being made available via this website.'

Southern California Perinatal Transport System
Phone:(714) 921-9755 & Fax (714) 921-9766

The Southern California Perinatal Transport System (SCPTS), formerly known as the Infant Medical Dispatch Center, was established in 1976 pursuant to the enactment of California Assembly Bill 4439. This act appropriated funds for the development of a dispatch service to address the need for facilitating transports of critically ill infants and mothers with high risk conditions to regional Neonatal Intensive Care Units (NICUs) and Perinatal High Risk Units (PHRUs).

Specific Legislative Mandate

- Establish a 24-hour-a-day, year-round dispatch center linking all hospitals providing obstetrical services with neonatal intensive care nurseries.
- Provide service for the region south of the Tehachapi Mountains (Southern California) encompassing the following 11 counties: Imperial, Inyo, Kern, Los Angeles, Orange, Riverside, San Bernardino, San Diego, San Luis Obispo, Santa Barbara, and Ventura.
- Assist, if needed, in referral of critically ill newborn infants to appropriate California Children Services (CCS) certified neonatal intensive care centers.
- Generate a centralized data base, consisting of statistical information for monitoring and evaluating the functions, efficiency, and timeliness of all infant transports within the southern California region.

AFTER HOURS AND DISASTER MANAGEMENT CONTACT

The CPeTS staff will be available on a continuous basis to assist with transport triage and technical problems, and provide assistance when a situation arises necessitating rapid bed availability updates. The telephone numbers to be used under such circumstances are:

Regular working hours:
 SCPeTS 714-921-9755
 NCPeTS 650-723-7342

After hours and weekends: 650-723-7342

In case of a countywide or regional emergency, contact your county Emergency Medical System and/or follow Hospital Disaster Prep Protocols. Click on the following link for a list of local EMS agency administrators.
http://www.emsa.ca.gov/Ems_lems/lemsa.asp
